## THE ARCHITECTURE OF LIGHT

**The sun: the best natural source of light and energy**

Danpalon® harnesses this inexhaustible source, providing exceptional quality of light. Danpalon's glazing material features Microcell panels which offer customers the best combination of translucency and strength, transmitting an even diffusion of natural light, with superior durability and impact resistance.

## The optimal solar and thermal balance

The Danpalon® panel provides exceptional quality of light, a rich non-industrial visual appeal and delivers thermal insulation and UV protection. Danpalon® contributes to optimal efficiency and significant savings in energy costs.

Centre Hospitalier Sud Francilien, France  
Glazing: Danpalon® 16mm | Architect: Groupe-6 Architectes

# DANPALON® PANEL

## LIGHT DIFFUSION. STRENGTH. FLEXIBILITY.

### SUPERIOR LIGHT DIFFUSION

The Microcell structure transmits an even diffusion of natural light, producing a rich look. Specifically designed for architectural daylight applications, the tight spacing between the ribs produces a superior quality of light, offering unique iridescence - reflecting and dispersing light in a way unmatched by any other material. Danpalon® Microcell panels are available in a range of thicknesses and widths.

### EXCEPTIONAL DURABILITY AND THERMAL INSULATION

Danpalon® Microcell panels are manufactured with unique and innovative extrusion technology, providing ten times more cells than the majority of other sheets on the market. The smaller spans between the rib supports give customers the best combination of translucency and strength. Danpalon® Microcell panels are 100% leakproof, offering superior impact resistance and thermal insulation.

Gymnasium Posco, Korea | Danpal® Single Glazing, 16mm | Architect: Posco A&C

## THE DANPALON MICROCELL STRUCTURE FEATURES 10 TIMES MORE CELLS THAN OTHER PANELS ON THE MARKET

The high concentration of cells provides Danpalon® Microcell with significantly lower thermal conductivity, improved mechanical properties and rigidity with high impact resistance.

## HIGH PERFORMANCE AND WEATHER RESISTANCE

Due to the tightness between the vertical supports, Danpalon® Microcell offers superior air and water tightness together with highest resistance to impact and hail damage.

### Air Tightness

### Water Tightness

- Reinforced safety gauge
- Improved inertia for improved lightness
- The very best air and water tightness available

## BENEFITS

- 100% waterproof
- Free thermal movement
- Easy installation
- High impact resistance
- Excellent thermal insulation
- Quality diffused daylight
- Cold bending of panels on site
- Reduced substructure
- Environmentally friendly product

# DANPALON® 3DLITE PANEL

## BALANCE YOUR LIGHT

### Block direct heat and glare

Optimizing natural light in buildings is an ongoing challenge. Danpalon 3DLITE is an advanced, innovative panel developed by Danpal®, enabling architects to design creatively while contributing to energy savings and increased lighting efficiency. Danpalon 3DLITE contains alternating integrated shading louvres which selectively control the sunlight to penetrate evenly during the day, while offering thermal insulation and a special dynamic look.

## LIGHT LEVELS DURING THE DAY

## 3DLITE STRUCTURE

### Balancing daylight throughout the day

Danpalon 3DLITE allows the sun's rays to penetrate through at higher levels during the morning and afternoon, while reducing heat in the middle of the day. This fixed, cost-effective solution optimizes daylight in office buildings, shopping malls, schools, libraries, stadiums, museums, and more.

## BENEFITS

- Dynamic light diffusion
- Flexible solution for summer and winter
- Optimises daylight throughout the day
- Wide variety of colours
- Part of Danpal's systems

# DANPALON® KINETIC PANEL

## DUAL COLOUR PANEL WITH DYNAMIC LOOK

Fascinating design is all a matter of perspective. And that's exactly what you get with Kinetic – the dynamic design solution from Danpal that enables the viewer to see a structure in one colour from one direction, and another colour from the other direction – providing a dynamic visual experience that changes depending on your perspective.

### Give buildings a new look

With its appealing, innovative exterior, Kinetic revitalizes the appearance of any building – rejuvenating older buildings or adding innovation when planning a new building.

### BENEFITS

- Dynamic look
- The ability to combine two colors in one panel
- Unparalleled choice of colours and colour combinations
- Lightweight
- Part of Danpal's systems

Variety of color combinations

# FINISHES

DANPAL OFFERS A RANGE OF PANEL SURFACE FINISHES ACCORDING TO ENVIRONMENTAL CONDITIONS AND ARCHITECTURAL REQUIREMENTS

## SOFTLITE FOR VISUAL COMFORT

Softlite finishing greatly diminishes glare effects. Softlite is a 100% permanent matt finish applied by co-extrusion on Danpalon® panels of any thickness and colour. The Softlite finishing performance is independently validated to

ensure maximum visual comfort, regardless of the exposure and type of building.

- Reduced “neon” effect
- Greater light diffusion
- Increased feeling of comfort

WITH SOFTLITE

WITHOUT SOFTLITE

## HP - HIGH PROTECTION TREATMENT

Danpalon® HP is an advanced surface treatment that enables higher performance in areas of graffiti removal and protection against environmental pollution.

The Danpalon® HP surface treatment can be applied to most types of Danpalon® panels.

CHEMICAL DESCRIPTION	WITHOUT HP	WITH HP
Gasoline	yes	yes

GaffiGauard 2030 (Guard Industrie France)	no	yes

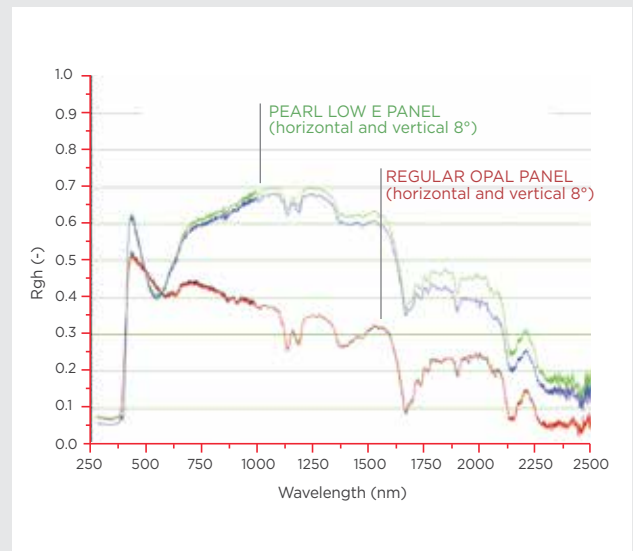

Veolia Energy, UK | Danpalon Single Glazing 16 mm  
Architects: S'pace

# DANPALON LOW E EFFECT

Allow better use of daylighting without adding more heat.

Infrared treatment is a co-extruded finish that significantly limits solar heat gain without affecting light transmission levels - creating better utilisation of daylight.

It works by selectively blocking solar radiation, leading to a reduction in solar loads and enabling significant reductions in air conditioning costs and carbon emissions.

“PEARL LOWE” has improved IR reflectivity characteristics, compared to a similar panel without infrared treatment (as shown in the graph).

## DANPALON® PANEL IDENTIFICATION - FOR FULL TRACEABILITY

Danpalon® is unique in offering details on the panel itself. These details include date of manufacture, enabling customers to easily see whether they are within their 10 year warranty period.

## IRIDESCENT APPEARANCE

## HEAT WELDED EDGES FOR PERFECT FINISHING

The welded edges provide a clean and effective solution that prevents water, dirt or insects from getting inside the microcells.

# TRANSLUCENT AND OPAQUE

For bright colours with a metallic, lacquered appearance, choose the opaque panels available in a wide range of tints. With Danpal's translucent range, the appearance of the building changes with the light and reflections projected onto the facade at different times of day.

# BICOLOUR FOR SPECIAL EFFECT

Our bicolour option enables you to perfectly adapt your facades to the effect you desire, both inside and outside. It is available in the colours of your choice for all Danpal® systems (subject to minimum quantities and lead times).

# UNLIMITED DESIGN OPTIONS AND STUNNING EFFECTS

As well as creatively playing with light in structures, with Danpalon® textures you can also play with different prints and designs. Danpalon's textures and prints bring a wide array of design options for interior and exterior walls and ceilings. We provide high quality designs and stunning effects that are perfectly adapted and overlaid. This allows you to create any type of atmosphere or appearance, adding interest to structures and complementing the design.

Danpalon® panels are designed with multiple dimensions and cell structures, in order to offer solutions that match your requirements

## IDEAL FOR CUSTOMISED AND UNITISED SOLUTIONS

### Our full service offering

- Project engineers and the sales force in your region will accompany you and follow up your projects, from their inception to completion.
- Our design office will assist and guide you in the implementation of the most suitable solution for your specific needs.
- The order processing and preparation service offers customized orders, reinforced packaging, accurate labelling and impeccable delivery.
- Our support service will promptly respond and assist you in finding solutions for your on-site challenges.
- We offer a full material warranty and are committed to meeting our customers' deadlines.

## COLOUR YOUR ATMOSPHERE WITH THE DANPAL® PALETTE

### ABOUT THE COMPANY

#### Innovative light architecture systems for building envelopes

Danpal® are creators of exceptional light-transmitting architectural systems for building envelopes, providing optimal solar and thermal comfort.

For 50 years, our innovative systems have helped architects to transform light (both natural and artificial) into a powerful and versatile tool, for architectural creations that are internally and externally radiant.

An industry visionary, Danpal® are originators of the Danpalon® translucent panel standing seam system - a light architecture solution used around the world in commercial, education, transport, health, sports and high-tech projects.

Today, the company offers complete systems - providing total solutions for the building envelope. Danpal® designs, manufactures and distributes an unmatched range of daylighting systems for all types of building requirements - from facades, cladding, roofs, skylights, shading, to interior and outdoor applications.

Danpal® systems are built around innovative technologies, deep architectural know-how and the ever evolving needs of our clients. Operating in five continents, Danpal® inspires architectural creativity with its rainbow of light architecture solutions.

#### Danpalon® Glazing Material is an integral part of Danpal's range of systems - giving you a complete solution
